

JetStream

Rostering and Time & Attendance Software

JetStream is PeopleKey's next generation Rostering and Time and Attendance solution. This powerful yet intuitive management system has been designed specifically to meet the Rostering, T&A and payroll integration needs of small to medium businesses. JetStream comes in two versions, JetStream Lite for the business looking for affordable payroll processing automation with relatively simple needs, and JetStream typically for the larger business requiring a richer set of features when automating their payroll processes. Regardless of its size, JetStream adds great value to any business when used in conjunction with PeopleKey Finger Scanners and FingerLan V device management software.
